PHOENIX HEALTHCARE SERVICES
NATIONWIDE DATA DRIVEN RCM

We help individuals and families living in the USA get their health care services paid by their private health insurance. We are growing. Can you help us to help them?

In 2008, after attending Mounts Bay School, Penwith College, and Gloucestershire University, Peter Scott (a proud Cornishman) moved to America where he established Phoenix Healthcare Services. Over the last 13 years—with the help of clients and employees—he has grown the company across the whole USA.

It has been Peter's dream to hire, train, and offer reliable, well paid employment to fellow Cornish men and women. Now is the time!

We take the pain out of this process for the health professionals who use our service. They don't need to hire their own staff to manage claims; we'll do it for them. This means they can concentrate more on health, not paperwork.

We have a 100% client satisfaction rating and work for over 10,000 health providers across all 50 states in the USA. We are proud of our 98% successful claim rate, which is much higher than our competitors achieve. We also save clients an average of 4 to 10% in their costs, and we increase their claim income by up to 30%.

Our smart system is improving US healthcare, but we need smart people to help us deliver it. We hire people from a variety of remote locations, but now we want to recruit people in Cornwall to join the team. We are all about flexible working and good pay. We know there is talent in Cornwall and we are looking to find it.

FLEXIBLE WORKING: We are looking for people to work from a combination of their homes, and the Penzance and Truro Workbox (www.theworkbox.com). We encourage our employees to choose where and how they can work most productively.
